CERTIFIED ACCESS SPECIALIST INSPECTION SERVICES

Compliance with state and federal construction-related accessibility standards ensures that public places are accessible and available to individuals with disabilities. Whether your business is moving into a newly constructed facility or you are planning an alteration to your current facility, by engaging the services of a Certified Access Specialist (CASp) early in this process you will benefit from the advantages of compliance and under the Construction-Related Accessibility Standards Compliance Act (CRASCA, Civil Code 55.51-55.545), also benefit from legal protections.

Although your new facility may have already been permitted and approved by the building department, it is important to obtain CASp inspection services after your move-in because unintended access barriers and violations can be created, for example, placing your furniture and equipment in areas required to be maintained clear of obstructions. For planned alterations, a CASp can provide plan review of your improvement plans and an access compliance evaluation of the public accommodation areas of your facility that may not be part of the alteration.

A CASp is a professional who has been certified by the State of California to have specialized knowledge regarding the applicability of accessibility standards. CASp inspection reports prepared according to CRASCA entitle business and facility owners to specific legal benefits, in the event that a construction-related accessibility claim is filed against them.

To find a CASp, visit www.apps2.dgs.ca.gov/DSA/casp/casp_certified_list.aspx.

6.36.010 Findings and purpose.

The City Council of the City of Santa Monica hereby finds:

(a) Sidewalk vending fosters vibrant public spaces and promotes a diverse and inclusive local economy.

(b) In order to promote the public peace, safety, health and welfare, sidewalk vending must be regulated to promote public safety; to ensure rapid access by first responder and emergency personnel to public and private spaces throughout the City; to facilitate ingress into and egress from vehicles, rights-of-way, buildings, and public spaces; to maximize use and promote maintenance of public rights-of-way, parks, the beach, and other public spaces; and to reduce the City's exposure to civil liability.

(c) Because the City is densely populated by residents and visitors, its public spaces often become extremely crowded. The City's parks, Pier, Promenade, Transit Mall and beaches, and many of the City's sidewalks and pedestrian paths, are all heavily trafficked by the public and congestion in these places is a constant norm.

(d) Palisades Park, situated between the Pacific Ocean, the Pier bridge, and the City's bustling downtown, is the crown jewel of the City's park system and is the most heavily utilized. Based on the Park's unique aesthetic qualities and unmatched scenic beauty, the City designed the Park as a local landmark and the City's local Coastal Program Land Use Plan requires review to, from, and along the Park be protected. Circulation within Palisades Park is limited because it is extremely narrow, and is physically surrounded by downtown streets on three sides and tall bluffs on the fourth.

(e) The unique and historic nature of many of the City's public spaces further requires special consideration. For example, the Santa Monica Pier is a long, narrow, wooden structure one thousand eighty feet long, supported by concrete and timber piles extended over the beach and ocean with limited points of entry and exit. The Santa Monica Pier is also on the State of California Protected Critical Infrastructure list, experiences a high volume of pedestrian traffic and is congested throughout the year. The Third Street Promenade and the Transit Mall similarly draw significant local and tourist pedestrian traffic, with crowds as large as 10,000 or more traveling each block of the narrow, open-air public rights-of-way each day. Careful regulation of vending activities is necessary to protect public safety and ensure accessibility in these highly trafficked tourist destinations. Similarly, many of the City's parks and beaches provide opportunities for community engagement and recreation; regulation of vending activities is necessary to ensure availability of open space for public engagement, access and recreation, and to protect the natural resources within and the scenic and natural character of the parks and beaches. Additionally, many of the sidewalks and pedestrian paths in the City are under eight feet wide, such that vending in these areas would unreasonably interfere with the flow of pedestrians and disrupt access for persons with disabilities or other special needs. (Added by Ord. No. 2607CCS § 2, adopted 4/9/19)

The licenses and permits include those required by any governmental agency that has jurisdiction over any aspect of the vending program.

3.1 Application Requirements

As part of the application process, a vehicle vendor must provide the following:
