- I. Introduction ..... 1
- II. Plaintiffs have failed to prove a violation of the CVRA..... 2
  - A. There is no legally significant RPV in Santa Monica elections..... 2
    - 1. Plaintiffs’ RPV analysis erroneously fails to determine whether majority bloc voting *causes* the *usual* defeat of minority-preferred candidates..... 2
    - 2. Plaintiffs’ method of identifying Latino-preferred candidates is wrong..... 3
    - 3. White bloc voting does not usually defeat Latino-preferred Council candidates..... 6
    - 4. Exogenous elections and ballot initiatives underscore the conclusion that there is no legally significant RPV in Santa Monica. .... 8
    - 5. Plaintiffs’ failure to prove legally significant RPV is fatal to their CVRA claim..... 9
  - B. The City’s at-large electoral system has not diluted Latino voting power. .... 9
    - 1. Vote dilution can be proven only by showing that some alternative method of election would enhance Latino voting power. .... 9
    - 2. Plaintiffs have not identified any alternative method of election that would enhance Latino voting power..... 11
  - C. Because there is no evidence of legally significant RPV or vote dilution, the Court need not reach the “[o]ther factors” set out in Section 14028(e)..... 12
  - D. The Court must find for the City to avoid unconstitutional application of the CVRA..... 14
- III. Plaintiffs have not proven their Equal Protection claim. .... 15
  - A. Plaintiffs have not proven a disparate impact caused by the City’s election system..... 16
  - B. The City did not adopt or maintain its electoral system to discriminate against minorities. .... 16
    - 1. Purposeful discrimination is an element of plaintiffs’ Equal Protection claim..... 16
    - 2. Proof of intentional discrimination requires more than mere awareness of a potentially adverse impact on minorities. .... 17
    - 3. The City’s electoral history belies plaintiffs’ discrimination claim..... 18
- IV. Conclusion ..... 25

1 **I. Introduction**

2 Latinos are just over 13% of Santa Monica’s eligible voters (and well under 10% of its *actual*  
3 voters), yet have consistently elected candidates of their choice to the City Council under the current  
4 at-large system. Notwithstanding this record of electoral success, plaintiffs ask the Court to ignore  
5 case law and common sense to conclude that, for Latino voters, present-day Santa Monica is the equiv-  
6 alent of what African-American voters faced in “the late ’60s in the Deep South.” (Pl. Br. at 10.)

7 To find a CVRA violation, this Court would need to adopt, as a matter of law, the following  
8 unsupported and illogical premises relied on by plaintiffs: (a) Latino voters can prefer only one candi-  
9 date, even though they may cast up to three or four votes in a City Council election; (b) Latino voters  
10 cannot prefer non-Latino candidates; and (c) the City is liable if Latino and white levels of support for  
11 a candidate differ, *even if the Latino-preferred candidate wins*. None of this is correct, and plaintiffs  
12 neither acknowledge nor attempt to distinguish the mountain of contrary case law. Latino voters can  
13 and typically do prefer more than one candidate in City Council elections; their preferred candidates  
14 are not always Latino; and differences in voting patterns are legally irrelevant unless they *cause* Latino-  
15 preferred candidates to lose. In reality, Latino-preferred candidates rarely lose in Santa Monica—and  
16 even more rarely do they lose *because of* differences in white and Latino support. There has been no  
17 legally significant racially polarized voting, no vote dilution, and no violation of the CVRA.

18 Plaintiffs have all but abandoned their Equal Protection claim. Dr. Kousser’s narrative of dec-  
19 ades-long discrimination unraveled at trial, as it became clear that he had failed to account for, among  
20 many other things, how the transformation of the City’s electoral system in 1946 *benefited* minorities  
21 and garnered the vocal support of the City’s most prominent minority leaders. Tellingly, plaintiffs now  
22 say almost nothing about 1946, and they say nothing at all about 1975. Plaintiffs’ theory of “intentional  
23 discrimination” now effectively reduces to speculation that a single councilmember in 1992 opposed a  
24 switch to districts not because he harbored racial animus, and not even because he wanted to preserve  
25 his seat (he was not running for reelection), but because he wanted to maintain a renters’ rights group’s  
26 ability to “dump” affordable housing in the Pico Neighborhood. (Pl. Br. at 18–19.) This speculation  
27 is contrary to the evidence—the councilmember said no such thing, and the renters’ rights group was  
28 co-chaired at the time by the leader of the commission that recommended a change in election systems.

1 In any event, even if true, this would be far from enough to sustain an Equal Protection claim.

2 **II. Plaintiffs have failed to prove a violation of the CVRA.**

3 To prevail on their CVRA claim, plaintiffs must prove *legally significant* racially polarized  
4 voting (RPV)—i.e., that Latino voters cohesively prefer certain candidates, and that those candidates  
5 are usually defeated as a result of white bloc voting. They must also prove vote dilution—i.e., that the  
6 City’s electoral system has reduced the ability of Latino voters to elect candidates of their choice as  
7 compared to some hypothetical alternative electoral system. Plaintiffs have proven neither.

8 **A. There is no legally significant RPV in Santa Monica elections.**

9 To prove legally significant RPV, plaintiffs must satisfy *Gingles*’s second precondition (that  
10 Latinos vote as a bloc) and third precondition (that whites also vote as a bloc and thereby “usually”  
11 cause the defeat of Latino-preferred candidates). (478 U.S. 30, 49–51; see also § 14026(e).)

12 **1. Plaintiffs’ RPV analysis erroneously fails to determine whether majority bloc  
13 voting causes the usual defeat of minority-preferred candidates.**

14 The third *Gingles* precondition requires plaintiffs “to demonstrate that the white majority votes  
15 sufficiently as a bloc to enable it . . . usually to defeat the minority’s preferred candidate. . . . In estab-  
16 lishing this [precondition], the minority group demonstrates that submergence in a white multimember  
17 district impedes its ability to elect its chosen representatives.” (478 U.S. at 51.) This precondition is  
18 satisfied where the differences in voting patterns between the majority and minority groups *result in*  
19 the defeat of minority-preferred candidates. (See, e.g., *Uno v. City of Holyoke* (1st Cir. 1995) 72 F.3d  
20 973, 980; *Salas v. Sw. Tex. Jr. Coll. Dist.* (5th Cir. 1992) 964 F.2d 1542, 1554–1555.) Plaintiffs must  
21 show that white bloc voting “usually” causes the defeat of Latino-preferred candidates, which “mean[s]  
22 something more than just 51%” of the time. (*Lewis v. Alamance Cty., N.C.* (4th Cir. 1996) 99 F.3d  
23 600, 606 & fn. 4; see also *Williams v. State Bd. of Elec.* (N.D.Ill. 1989) 718 F.Supp. 1324, 1328 & fn.  
24 5 [“usually” means, at the very least, “more often than not”].)

25 Plaintiffs and Dr. Kousser rely on the false premise that it is unnecessary to show any causal  
26 connection between RPV and minority-preferred candidates losing. (Br. at 6–10.) Courts have  
27 properly rejected Dr. Kousser’s incorrect conception of RPV, which “focuses exclusively on the rela-  
28 tive percentage of Latino and white voters who chose the Latino candidate,” but fails to “address  
whether the percentage of white . . . voters who voted against that candidate was sufficient to defeat

1 him or her.” (*Cano v. Davis* (C.D.Cal. 2002) 211 F.Supp.2d 1208, 1238 & fn. 34 (three-judge panel).)

2 **2. Plaintiffs’ method of identifying Latino-preferred candidates is wrong.**

3 “The proper identification of minority voters’ ‘representatives of . . . choice’ is critical.” (*Col-*  
4 *lins v. City of Norfolk* (4th Cir. 1989) 883 F.2d 1232, 1237.) Plaintiffs contend that this step is as simple  
5 as identifying minority candidates, citing *Gingles*. (Br. at 6.) But *Gingles* says no such thing. The  
6 Court used the phrase “black candidate” to refer to the *black-preferred* candidate only “as a matter of  
7 convenience”; Justice Brennan explained that the race of the candidate is *irrelevant* because “it is the  
8 *status* of the candidate as the *chosen representative of a particular racial group*, not the race of the  
9 candidate, that is important.” (478 U.S. at 67–68.) Ever since, courts have uniformly rejected the  
10 proposition that a minority group cannot prefer a candidate of a different race or ethnicity. (Part  
11 II.A.2.b.) *Gingles* left many questions unresolved, including *how* to identify minority-preferred can-  
12 didates in multiseat elections. Circuit courts have filled in these gaps, but plaintiffs do not even  
13 *acknowledge* those decisions, instead incorrectly asserting (1) Latino voters can prefer only one candi-  
14 date despite having three or four votes; and (2) that candidate must also have a Latino surname or be  
15 recognized as Latino. Neither assertion is the law, and plaintiffs’ case collapses without them.

16 **a. Latino voters can and often do prefer multiple Council candidates.**

17 “In the multi-seat contests at issue here, the identification of minority-preferred candidates is  
18 complex. Because a voter can cast more than one vote, minority voters may (but will not necessarily)  
19 have a second (or third [or fourth]) candidate of choice.” (*Mo. State Conf. of the NAACP v. Ferguson-*  
20 *Florissant Sch. Dist.* (E.D.Mo. 2016) 201 F.Supp.3d 1006, 1041.) Further complicating matters is that  
21 some voters may choose to “single-shot” or “bullet” vote—that is, vote for a single strongly preferred  
22 candidate instead of diluting their support for that candidate by casting equally valuable votes for other  
23 candidates as well. “A critical question, then,” in light of these complexities, “is how to identify  
24 whether minority voters in fact have a second or third candidate of choice in a given election.” (*Ibid.*)

25 “[L]ooking only at the top-ranked candidate does not capture the full voting preference picture  
26 in the context of a multi-seat election because it disregards the fact that multiple seats are available in  
27 each election, and with that the possibility that minority voters prefer more than one candidate.” (*Id.*)

28

1 at 1047.) To accommodate this possibility, many courts, including the Ninth Circuit, define as “mi-  
2 nority-preferred” any “candidate who receives sufficient votes to be elected if the election were held  
3 only among the minority group in question.” (*Ruiz v. City of Santa Maria* (9th Cir. 1988) 160 F.3d  
4 543, 552; accord *Lewis*, 99 F.3d at 614; *Clay v. Bd. of Educ.* (8th Cir. 1996) 90 F.3d 1357, 1361–1362.)

5 Identifying all the candidates who received sufficient votes from the relevant minority group is  
6 not the end of the analysis, however, because sometimes that group might prefer one or more of those  
7 candidates more strongly than others. For that reason, courts have held that it is error to “treat[] as  
8 ‘minority-preferred’ successful candidates who had significantly less [minority] support than their un-  
9 successful opponents.” (*N.A.A.C.P., Inc. v. City of Niagara Falls* (2d Cir. 1995) 65 F.3d 1002, 1017.)  
10 Conversely, “if the unsuccessful candidate who was the first choice among minority voters did not  
11 receive a ‘significantly higher percentage’ of the minority community’s support than did other candi-  
12 dates . . . , then the latter should also be viewed . . . as minority-preferred candidates.” (*Levy v. Lex-*  
13 *ington Cty.* (4th Cir. 2009) 589 F.3d 708, 716; see also *Niagara*, 65 F.3d at 1018.)<sup>1</sup>

14 Finally, to ensure that candidates with only tepid minority support do not count in the *Gingles*  
15 analysis, some courts hold that candidates cannot be deemed minority-preferred unless they win at least  
16 50% of the minority group’s votes. (E.g., *Niagara*, 65 F.3d at 1019; see also *Lewis*, 99 F.3d at 614  
17 [candidates receiving less than 50% of minority vote deemed preferred only given further evidence].)

18 Identifying preferred candidates is thus a 3-step analysis: (1) start with candidates who would  
19 have won if only Latinos had voted; (2) if Latinos’ top choice was unsuccessful, determine whether  
20 Latino support for that candidate was “significantly” higher than for other Latino-preferred candidates;  
21 (3) disregard candidates who did not earn at least half of Latino votes (absent further evidence).

22 **b. Latino-preferred candidates need not be Latino or Latino-surnamed.**

23 Neither the CVRA nor the federal law it incorporates provides that minority voters must prefer  
24 only candidates of their own race. (*Sanchez v. Bond* (10th Cir. 1989) 875 F.2d 1488, 1495 [“Such a  
25 rule would be clearly contrary to the plurality opinion” in *Gingles*, and inconsistent with “the language  
26 of § 2”].) RPV is defined in terms of *voter* preference, not candidate ethnicity. (§ 14026(e); see also  
27 § 14028(b) [focusing on “support . . . from members of a protected class”].) And courts, including the

28 <sup>1</sup> “The level of support that may properly be deemed ‘substantial’ will vary . . . depending on the number  
of candidates on the ballot and the number of seats to be filled.” (*Lewis*, 99 F.3d at 614, fn. 11.)

1 Ninth Circuit, have consistently held that minority-preferred candidates need not themselves be mem-  
2 bers of the minority group. (See *Ruiz*, 160 F.3d at 551 [joining eight other circuits “in rejecting the  
3 position that the ‘minority’s preferred candidate’ must be a member of the racial minority”].) Plaintiffs’  
4 view—that minorities can prefer only minorities—“would itself constitute invidious discrimination”  
5 and would “place the imprimatur of law behind a segregated political system.” (*Lewis*, 99 F.3d at 607.)

6 Dr. Kousser admitted that in a prior CVRA case he counted a white candidate as “Latino-pre-  
7 ferred,” even though a Latino candidate was also running; Levitt agreed with that approach. (VF1.  
8 N.B. All “VF” citations refer to numbered paragraphs in the City’s Proposed Verdict Form.) Dr.  
9 Kousser abandoned that methodology here only because it eviscerates plaintiffs’ case.

10 Focusing on only Latino-surnamed candidates leads to absurd results. In 1996, for example,  
11 Dr. Kousser estimates that roughly *all* Latino voters voted for three white candidates, and yet he focuses  
12 only on Alvarez, who was Latino voters’ *seventh* choice. (VF2.) In 2008, Piera-Avila likewise ap-  
13 peared on fewer Latino ballots than multiple white candidates. (VF3.) Dr. Kousser attempted to brush  
14 that fact aside by suggesting that Piera-Avila was nevertheless preferred by Latino voters because she  
15 was one of their top four choices or, alternatively, that she received few Latino votes because of “stra-  
16 tegic voting”—Latinos selecting different candidates perceived to have a better chance at winning.  
17 (VF4.) The former explanation contradicts plaintiffs’ insistence that there can be only one Latino-  
18 preferred candidate in an election. And the latter is nonsensical; not only does it depend on Latino  
19 voters having a strong pre-election sense as to whether a candidate might win, it is contradicted by  
20 Latino support for Latino-surnamed candidates both before and after 2008. (VF5.)

21 **c. The court should examine *all* Council elections.**

22 Courts deciding statutory vote-dilution claims examine *all* elections, including those in which  
23 only white candidates ran.<sup>2</sup> Courts have every “right to consider these elections and to give them such  
24 weight as the circumstances warrant.” (*Sanchez*, 875 F.2d at 1495.) Plaintiffs are wrong to disregard  
25 such elections entirely. Nor are they faithful to their claim that only “cross-racial” elections matter—

26 <sup>2</sup> Plaintiffs will point to § 14028(b), which addresses, in part, “elections in which at least one candidate  
27 is a member of a protected class.” But that same subdivision goes on to state that “elections involving  
28 ballot measures,” or, more generally, “other electoral choices that affect the rights and privileges of  
members of a protected class,” are relevant to the RPV inquiry. The same subdivision also states that  
the success rate of candidates who are members of a protected class and preferred by that class is but  
“[o]ne circumstance that may be considered by the Court.”

1 they ignore the 2014 election, in which a Latino-surnamed candidate, Zoe Muntaner, ran (and finished  
2 last out of 14 candidates); Muntaner was not even close to preferred by Latinos, but more than half of  
3 Latino voters voted for a white candidate, McKeown. (VF6.)

4 **3. White bloc voting does not usually defeat Latino-preferred Council candidates.**

5 Plaintiffs cannot show that white bloc voting usually causes the defeat of Latino-preferred can-  
6 didates because such candidates generally *win*. Those candidates must be identified in three steps:

7 **Step 1:** Which candidates would have won had Latinos been the only voters? Under this rudi-  
8 mentary analysis, it is undisputed that “Latino-preferred” candidates won 73% of the time from 2002  
9 to 2016, and 62% of the time in plaintiffs’ seven cherry-picked elections. (VF7.) Two of those Latino-  
10 preferred candidates, Tony Vazquez and Glean Davis, also happen to be Latino.<sup>3</sup>

11 **Step 2:** If the candidate who won the most Latino votes was unsuccessful, was Latino support  
12 for that candidate “significantly” higher than for other Latino-preferred candidates? This analysis elim-  
13 inates seven candidacies in plaintiffs’ seven favored elections:

- 14 • **1994:** none eliminated (three candidates, including Vazquez, have point estimates over 100%)<sup>4</sup>
- 15 • **1996:** Bloom (52%) eliminated, as three candidates have point estimates near or above 100%
- 16 • **2002:** O’Connor eliminated (Aranda arguably wins significantly more votes, and loses)<sup>5</sup>

17 <sup>3</sup> Glean Davis is Latina. (VF8.) The CVRA defines “protected class” by reference to the FVRA.  
18 (§ 14026(d).) The FVRA, in turn, defines as one protected class “persons who are . . . of Spanish  
19 heritage.” (52 U.S.C. §§ 10303(f)(2), 10310(c)(3).) Because the statute speaks only in terms of the  
20 fact of Spanish heritage, not others’ perception, Ms. Davis is Latina, and Mr. Brown’s poll is irrelevant.

21 <sup>4</sup> All point estimates are taken from Dr. Kousser’s weighted-ER analysis, which plaintiffs assert is the  
22 most accurate estimation methodology. (VF9.) Dr. Lewis’s estimates are consistent with Dr.  
23 Kousser’s. (VF10.)

24 <sup>5</sup> Plaintiffs will argue that Aranda was meaningfully more preferred than McKeown. She is not. Their  
25 Latino-support point estimates are nearly identical (82.6% and 76.8%)—far from “significantly” dif-  
26 ferent, either under the relevant cases or as a statistical matter, particularly given the large confidence  
27 intervals around these point estimates. (VF11.) Plaintiffs will argue that the largely overlapping con-  
28 fidence intervals should be disregarded, citing *Fabela v. City of Farmers Branch* (N.D.Tex. Aug. 2,  
2012) 2012 WL 3135545 and *Benavidez v. Irving Ind. Sch. Dist.* (N.D.Tex. Aug. 15, 2014) 2014 WL  
4055366. But those cases do not hold that a point estimate is to be considered without reference to the  
confidence interval, or that one point estimate barely larger than another indicates a statistically or  
legally meaningful difference. The insignificance of the small difference between these point estimates  
is particularly apparent given the imprecision of ER and EI on Santa Monica’s demographic facts, as  
Dr. Lewis explained. Plaintiffs make the straw-man argument that Dr. Lewis outright rejected ER and  
EI as unreliable. (Br. at 10–12.) Not so, as he repeatedly explained at trial. (VF12.) But his analysis  
does show that there is no reason to assume that small differences in estimates—like the gap in point  
estimates between Aranda and McKeown—are meaningful. First, the small population and dispersion  
of Latinos in Santa Monica make the confidence intervals unusually wide, and the point estimates  
correspondingly less accurate. Second, the intervals are also systematically inaccurate. Dr. Lewis  
showed that ER in particular depends on an assumption that, if wrong, biases its results, and he proved  
that *both* ER *and* the neighborhood model, which depends on a different assumption, produce biased

- 1 • **2004:** Bloom (55%), Hoffman (40%), and Genser (39%) eliminated because Loya wins a significantly higher share of Latino votes (106%) and loses
- 2 • **2008:** none eliminated (top four candidates have point estimates between 21% and 55%)
- 3 • **2012:** none eliminated (Latinos' top four candidates all win)
- 4 • **2016:** O'Day and Davis eliminated (de la Torre and Vazquez win a significantly higher share of votes, and de la Torre loses) (VF14)

5       **Step 3:** Disregard candidates who earned too few Latino votes. This removes Piera-Avila, Bloom, and Rubin in 2008 (who all fell short of the 50% threshold).<sup>6</sup> (VF15.)

6       Thus, in the seven elections involving Latino-surnamed candidates on which Plaintiffs have  
7 relied, the Latino-preferred candidates are: Vazquez, O'Connor, and Finkel in 1994; Feinstein, Olsen,  
8 and Genser in 1996; Aranda and McKeown in 2002; Loya in 2004; Genser in 2008; Vazquez, O'Day,  
9 Winterer, and Davis in 2012; and de la Torre and Vazquez in 2016. (VF14.)

10       Next, the Court must ask whether any of these candidates were defeated by white bloc voting.  
11 Plaintiffs' summary tables make that analysis impossible because they compare only two numbers—  
12 the levels of Latino and white support for a Latino-surnamed candidate. (Br. at 7; VF17.) This purely  
13 horizontal analysis misses the *vertical* dimension of each full election table.

14       Consider 1994, for example. Dr. Kousser's summary table shows only that Latino and white  
15 voters supported Tony Vazquez at statistically significantly different levels.<sup>7</sup> (VF18.) This omits that  
16 whites did not vote cohesively as a bloc; they split their votes almost evenly across their top five  
17 candidates. Vazquez was (by point estimates) whites' third choice—meaning that if whites had been the  
18 only voters, Vazquez would have *won*. (VF20.) He lost not because of white bloc voting, but because  
19 he attracted scarcely any votes from Asian and African-American voters (point estimates of - 209.4  
20 and 19.2, respectively). (VF21.) Vazquez's defeat is thus not evidence of legally significant RPV.  
21 (*Nipper v. Smith* (11th Cir. 1994) 39 F.3d 1494, 1533 [“to be actionable, the electoral defeat at issue  
22 must come at the hands of a cohesive white majority”].) Analyzed properly—i.e., both horizontally  
23 *and* vertically—Dr. Kousser's tables show that just 3 of 16 Latino-preferred candidates were arguably  
24 defeated by white bloc voting in the past 22 years: Aranda (2002), Loya (2004), and de la Torre (2016).

25  
26 confidence intervals when applied to Santa Monica's demographics. (VF13.) Thus, on the facts here,  
ER and EI are blunt instruments—not precise enough to make small differences legally meaningful.

27 <sup>6</sup> Bloom's 2008 point estimate is 49.7% under Dr. Kousser's weighted-ER model, but 56% under Dr.  
28 Lewis's weighted-ER model. (VF16.) To give plaintiffs the benefit of the doubt, he has been excluded.

<sup>7</sup> This is true only according to ER; according to EI, voting for Vazquez was not polarized. (VF19.)

1 (VF22.) That is far from “usual” defeat “at the hands of a cohesive white majority.”<sup>8</sup>

2 Plaintiffs cannot show usual defeat on account of white bloc voting even if the Court narrows  
3 its focus not just to the elections selected by plaintiffs, but to the Latino-surnamed candidates who ran  
4 in those elections. Alvarez, Gomez, and Duron were not Latino-preferred, and voting for Alvarez and  
5 Duron was not racially polarized in any event. (VF26.) Vazquez won twice, and was not defeated by  
6 white bloc voting in 1994. (VF21.) Even if the Court does not discount Piera-Avila or de la Torre,  
7 plaintiffs have shown the defeat of a Latino-surnamed candidate through white bloc voting at most four  
8 of ten times. (VF22.) Dr. Kousser admitted that if, as the law requires, plaintiffs must prove *both* that  
9 voting was racially polarized and that the Latino-preferred candidates usually lost as a result, then  
10 plaintiffs fall short of that standard. (VF27.) This is dispositive. (E.g., *Askew v. City of Rome* (11th  
11 Cir. 1997) 127 F.3d 1355, 1381; *Perez v. Abbott* (W.D.Tex. 2017) 253 F.Supp.3d 864, 899.)<sup>9</sup>

12 **4. Exogenous elections and ballot initiatives underscore the conclusion that there is  
13 no legally significant RPV in Santa Monica.**

14 Plaintiffs do not deny that Latino-preferred candidates have won the vast majority of exogenous  
15 elections (School, College, and Rent Control Boards). (VF28.) Voting on ballot initiatives likewise  
16 shows that the City’s white voters joined Latino voters in sufficient numbers to reject several racially  
17 charged propositions (Props. 187, 209, 227, and 54), even though three of them were approved

18 <sup>8</sup> Even if Piera-Avila (2008) were counted as preferred, it would be only 4 of 17, still not usual defeat.  
19 Further, the Court should disregard de la Torre’s 2016 defeat. *Gingles* excludes from the RPV analysis  
20 certain outcomes that depend on “special circumstances.” (478 U.S. at 51.) In 2016, after his wife and  
21 his organization (PNA) filed this lawsuit, de la Torre entered the City Council election. In his multiple  
22 successful School Board campaigns, de la Torre had sought endorsements from civic organizations;  
23 raised as much as \$35,000; used a candidate-control committee; and advertised, including with mailers.  
24 (VF23.) Other candidates, both successful and unsuccessful, described taking similar steps in their  
25 campaigns. (VF24.) But in 2016, de la Torre sought no endorsements, raised less than \$1,000, had no  
26 candidate-control committee, and did no advertising. (VF25.) This evidence shows that he ran and lost  
27 on purpose to bolster plaintiffs’ weak case. Plaintiffs will argue that the City’s special-circumstances  
28 argument is an improper attack on a minority candidate’s qualifications, citing *Ruiz*, 160 F.3d at 558.  
This is wrong. First, the City is not attacking de la Torre, but arguing that he *is* a qualified candidate  
who very well may have won if only he had made a genuine attempt—by doing the things he had done  
in every other election in which he ran (and won). Second, the City’s argument is quite similar to a  
special-circumstances theory *endorsed* by *Ruiz*—namely, one rooted in unusual endorsement and fund-  
raising activity. (*Ibid.*) Plaintiffs have not argued that the Court should discount any candidacies be-  
cause of “special circumstances”; they have waived any argument to that effect.

<sup>9</sup> Recognizing as much, plaintiffs tried to pivot at trial to a theory that the analysis is *election*-centric  
rather than *candidate*-centric. But in multi-seat elections, it is the success rate of minority-preferred  
*candidates* that matters; where voters have three or four votes to cast, minority groups can and do prefer  
more than one candidate in each election. (See Part II.A.2.a.)

1 statewide. (VF29.) In 2002, an estimated 57% of white voters joined an estimated 82% of Latino  
2 voters in voting against Measure HH, which called for districts (and failed to pass). (VF30.)

3 Plaintiffs deflect from this record of success by again focusing solely on the differences between  
4 white and Latino support for Latino-preferred candidates and ballot measures. (Br. at 9–10.) This is a  
5 microcosm of the central flaw in plaintiffs’ RPV analysis: They do not take into account *whether the*  
6 *Latino-preferred candidate (or result) prevails*. Latinos’ preferences won out as to all 3 of the ballot  
7 measures that plaintiffs mention, and 13 of the 15 Latino-preferred candidacies mentioned by plaintiffs  
8 were successful (not including Duron’s 2014 Rent Board election, which he effectively won unop-  
9 posed). (VF31.) Whites consistently support Latino-preferred outcomes in sufficient numbers for  
10 those outcomes to occur; plaintiffs have therefore not satisfied the third *Gingles* precondition.

11 **5. Plaintiffs’ failure to prove legally significant RPV is fatal to their CVRA claim.**

12 Plaintiffs’ failure to prove legally significant RPV necessarily dooms their CVRA claim. (E.g.,  
13 *Pope v. Cty. of Albany* (2d Cir. 2012) 687 F.3d 565, 582; *Clay*, 90 F.3d at 1361.)

14 **B. The City’s at-large electoral system has not diluted Latino voting power.**

15 A public entity violates the CVRA only if its at-large method of election “*impairs* the ability of  
16 a protected class to elect candidates of its choice or its ability to influence the outcome of an election,  
17 *as a result of the dilution* or the abridgment of the rights of voters who are members of a protected  
18 class.” (§ 14027, italics added.) Courts interpreting similar language in § 2 of the FVRA require proof  
19 of *harm* (vote dilution) and *causation* (a connection between the harm and the electoral system). (E.g.,  
20 *Gingles*, 478 U.S. at 48, fn. 15; *Gonzalez v. Ariz.* (9th Cir. 2012) 677 F.3d 383, 405; *Aldasoro v. Ken-*  
21 *nerston* (S.D.Cal. 1995) 922 F.Supp. 339, 369, fn. 10.) California courts have stated, but not yet held,  
22 that the CVRA similarly demands proof of vote dilution caused by an election system. (*Rey v. Madera*  
23 *Unified Sch. Dist.* (2012) 203 Cal.App.4th 1223, 1229; *Jauregui v. City of Palmdale* (2014) 226  
24 Cal.App.4th 781, 802; *Sanchez v. City of Modesto* (2006) 145 Cal.App.4th 660, 666.)<sup>10</sup>

25 **1. Vote dilution can be proven only by showing that some alternative method of**  
26 **election would enhance Latino voting power.**

27 <sup>10</sup> The Court need not reach the question of vote dilution if it agrees that plaintiffs have failed to prove  
28 legally significant RPV. If the Court does reach this question, it must decide (1) whether vote dilution  
is an element of the CVRA and (2) if not, whether the CVRA may constitutionally be applied to man-  
date a race-based change in election system absent evidence of vote dilution. (See Part II.D.)

1 To prove vote dilution, a plaintiff must show that a protected class would have greater oppor-  
2 tunity to elect candidates of its choice under some other electoral system, which serves as a “bench-  
3 mark” for comparison. (See, e.g., *Reno v. Bossier Parish Sch. Bd.* (1997) 520 U.S. 471, 480; *Holder*  
4 *v. Hall* (1994) 512 U.S. 874, 880 (plurality)<sup>11</sup>; *Gingles*, 478 U.S. at 50, fn. 17.) “[I]n order to decide  
5 whether an electoral system has made it harder for minority voters to elect the candidates they prefer,  
6 a court must have an idea in mind of how hard it ‘should’ be for minority voters to elect their preferred  
7 candidates under an acceptable system.” (*Gingles*, 478 U.S. at 88 (O’Connor, J., concurring).)

8 The “protected voting group” should have “a voting opportunity that relates favorably to the  
9 group’s population in the jurisdiction for which the election is being held.” (*Smith v. Brunswick Cty.,*  
10 *Va., Bd. of Supervisors* (4th Cir. 1993) 984 F.2d 1393, 1400.) But the key word is “opportunity”—  
11 “while a plan must provide a meaningful ‘opportunity to exercise an electoral power that is commensurate  
12 with its population,’ that is not the same as a guarantee of success”; to the contrary, “a necessary  
13 part of equal participation is the possibility of a loss.” (*United States v. Euclid City Sch. Bd.* (N.D. Ohio  
14 2009) 632 F.Supp.2d 740, 752.) “[T]he ultimate right of § 2 is equality of opportunity, not a guarantee  
15 of electoral success for minority-preferred candidates of whatever race.” (*Johnson v. De Grandy*  
16 (1994) 512 U.S. 997, 1014, fn. 11.)

17 Where comparison to any reasonable benchmark reveals that a protected class’s votes are *not*  
18 being diluted—i.e., where that class *already has* a voting opportunity that relates favorably to its pop-  
19 ulation—there is no legal requirement to jettison an at-large system; “there neither has been a wrong  
20 nor can be a remedy.” (*Emison v. Growe* (1993) 507 U.S. 25, 40–41.) Levitt agreed as much. (VF32.)  
21 Any requirement to abandon an at-large method of election despite a lack of vote dilution would violate

22  
23 <sup>11</sup> The *Hall* Court further explained that, “[i]n certain cases, the benchmark for comparison in a § 2  
24 dilution suit is obvious. . . . But where there is *no objective and workable standard* for choosing a  
25 reasonable benchmark by which to evaluate a challenged voting practice, it follows that the voting  
26 practice cannot be challenged as dilutive under § 2.” (512 U.S. at 880–881, italics added.) Here, the  
27 only “objective and workable standard for choosing a reasonable benchmark” is the one selected by  
28 the Supreme Court in *Bartlett v. Strickland* (2009) 556 U.S. 1, 16–25 (plurality): a constitutionally  
permissible single-member district in which minority voters account for a majority of the CVAP. The  
Court need not follow *Bartlett* to grant judgment in favor of the City, because plaintiffs’ hypothetical  
alternative methods of election would not enhance Latino voting strength. (Part II.B.2.) Nevertheless,  
the City raises this argument here—that the only appropriate vote-dilution “benchmark” is a hypothet-  
ical district whose voting-age population is majority-Latino—to preserve it.

1 the federal constitution. (See, e.g., *Bartlett*, 556 U.S. at 21–22; U.S. Const., am. XIV.)

2 **2. Plaintiffs have not identified any alternative method of election that would en-**  
3 **hance Latino voting power.**

4 The parties agree it is impossible to draw a majority-Latino district in the City. (VF33.) But it  
5 is at least possible that the CVRA, unlike federal law, permits plaintiffs to show vote dilution in some  
6 other way. Ely proposes a “Pico Neighborhood District” with a Latino CVAP of 30%.<sup>12</sup> (VF34.) He  
7 estimated that in three elections (1994, 2004, and 2016), a Latino candidate would have won the most  
8 votes in that district. (VF36.) There are several major problems with this analysis.

9 **First**, there is no precedent in case law or expert practice for Ely’s methodology. The Latino  
10 CVAP of his proposed district is just over half the bare majority required for a federal claim to be  
11 cognizable. Because this figure is so low, Ely could not presume that Latino voters would be able to  
12 elect candidates of their choice; he had to invent a new test—estimating vote totals for each candidate  
13 in his district under three calculation methodologies. (VF37.) He admits that this test has no value in  
14 determining who would have actually won in his proposed district. (VF38.) Among other things, the  
15 candidates would be different in a districted election, because residency within the district would be a  
16 prerequisite of candidacy, and it would likely be necessary to earn a majority of votes to win, such that  
17 runoffs might become necessary. (VF39.) As a result, for example, Ely’s conclusion about the 1994  
18 election is meaningless because Vazquez did not live in the proposed district and therefore could not  
19 have won there. (VF40.)

20 **Second**, Latino CVAP in the proposed district is far below the 50% threshold of exclusion for  
21 a one-seat election; Latinos alone would be unable to elect candidates of their choice. (VF41.) Further,  
22 Latinos outside the district would be submerged in overwhelmingly white districts. (VF42.)

23 **Third**, Ely’s opinion is outcome-driven and incomplete. He testified on direct examination  
24 about only *three* elections (1994, 2004, and 2016). His conclusion about the 2016 election is simply  
25 wrong; his own numbers show that the purportedly Latino-preferred candidate, de la Torre, would have  
26 *lost* under two of three scenarios to O’Day, who has lived in the Pico Neighborhood for 20 years.

27 <sup>12</sup> Levitt could not identify a single judicially created district with such low minority CVAP anywhere  
28 in the country. (VF35.) If the Court were to find a violation here, this case would be an extreme outlier.  
Plaintiffs point to *Georgia v. Ashcroft* to justify the creation of an “influence” district with minority  
CVAP as low as 25% (Br. at 24), but that was a § 5 case, *not* a § 2 case. The Supreme Court has held  
that “the lack of [influence] districts cannot establish a § 2 violation.” (*Bartlett*, 556 U.S. at 25.)

1 (VF43.) (And both lost to Vazquez, who does not live there; districts would have robbed voters of  
2 their top choice.) But Ely also analyzed four other elections. On cross-examination, Ely claimed that  
3 he omitted those from his opinion because they did not meet one of his criteria—that the Latino candi-  
4 date must receive at least half the number of votes necessary to win citywide. (VF44.) In fact, in three  
5 of the omitted elections, a Latino candidate *did* receive at least that many votes. (VF45.) Ely did not  
6 include those Latino candidates in his analysis because they did not come in first in his Pico district.  
7 (VF46.) In 2012, for example, although Vazquez won citywide in an at-large election, he would not  
8 have received the most votes in Ely’s district. (VF47.) In each of the four omitted elections, districts  
9 would have changed nothing—the top choices in the district prevailed citywide. (VF48.)

10 **Fourth**, because plaintiffs are unable to show that districts would enhance Latino voting power,  
11 the Court should not overlook the unrebutted evidence that districts would *dilute* the voting power of  
12 African-Americans and Asians. (VF49.) In 5 of the 7 at-large elections that Dr. Kousser studied,  
13 African-Americans’ top choice was elected; the current system does not dilute their votes. (VF50.)

14 Levitt’s analysis of alternative at-large systems likewise does not prove vote dilution. His anal-  
15 ysis depends not on CVAP, but on Latinos’ share of *actual* voters exceeding the “threshold of exclu-  
16 sion” of 12.5% under a destaggered at-large system. (VF51.) Any group’s ability to meet such a  
17 threshold depends on its levels of cohesion and turnout. (VF52.) Latinos account for 13.6% of the  
18 City’s CVAP, barely more than the threshold of exclusion if they *all* show up to vote *and* all vote  
19 cohesively. But historical Latino cohesion and turnout are nowhere close to 100%. (VF53.) Courts  
20 analyzing at-large alternatives presume minority turnout of 2/3. (E.g., *Euclid City Sch. Bd.*, 632  
21 F.Supp.2d at 761–770.) Here, that same presumption would predict Latinos’ share of actual voters to  
22 be 9%, well under the 12.5% exclusion threshold.<sup>13</sup>

23 **C. Because there is no evidence of legally significant RPV or vote dilution, the Court need  
24 not reach the “[o]ther factors” set out in Section 14028(e).**

25 In adjudicating statutory vote-dilution claims, courts do not consider evidence other than voting

26 <sup>13</sup> In *Euclid City School Board*, 2/3 of the minority CVAP (40%) was 27% of voters, which exceeded  
27 the 25% threshold of exclusion. (632 F.Supp.2d at 770.) Plaintiffs are wrong in emphasizing eligible  
28 voters (CVAP) rather than actual voters (turnout) in assessing the merits of *alternative at-large* sys-  
tems. The two cases they cite, *City of Euclid* and *Village of Port Chester*, reject consideration of turnout  
when evaluating a group’s ability to constitute a majority in a *district*. For that entirely distinct analysis,  
CVAP is the relevant guideline. (*Euclid*, 580 F.Supp.2d at 604; *Chester*, 704 F.Supp.2d at 425–427.)

1 results unless a plaintiff has proven legally significant RPV. (E.g., *Gingles*, 478 U.S. at 48 & fn. 15;  
2 *Johnson v. Hamrick* (11th Cir. 1999) 196 F.3d 1216, 1220; *McNeil v. Springfield Park Dist.* (7th Cir.  
3 1988) 851 F.2d 937, 942.) Because plaintiffs have not done so, there is no cause for the Court to  
4 address secondary evidence of vote dilution. There also must be a causal connection between the  
5 “[o]ther factors” and vote dilution; generalized grievances about alleged social problems cannot  
6 demonstrate vote dilution. (See § 14028(e).) Plaintiffs are also wrong to use the Pico Neighborhood  
7 (“Pico”) as a proxy for the City’s Latino residents, the vast majority of whom do not live there. (VF54.)  
8 Further, Pico is little different from other neighborhoods across a wide range of metrics. (VF55.) Nev-  
9 ertheless, the City will respond briefly to plaintiffs’ arguments. (Br. at 14–17.)

10 **First**, plaintiffs have not proven a history of official discrimination within Santa Monica. Their  
11 only City-specific evidence is that the beach was once segregated—but that was by tradition, not law.  
12 (VF56.) The Court should reject plaintiffs’ effort to incorporate by reference evidence from *Garza*, a  
13 28-year-old case that did not concern Santa Monica. Plaintiffs introduced no evidence of racial cove-  
14 nants in Santa Monica, which have not been legally enforceable for 70 years in any event. And the  
15 City was not responsible for a *DOJ* repatriation program or a *statewide* English-literacy requirement.

16 **Second**, there are sound, non-discriminatory reasons to stagger elections—e.g., reducing con-  
17 fusion and uninformed decision-making associated with voting for seven candidates at once, and giving  
18 voters the opportunity to make their voices heard every two years instead of every four.<sup>14</sup> (VF57.)

19 **Third**, plaintiffs’ generic assertions about education and income disparities do not demonstrate  
20 that Latinos’ participation in the political process is hindered. The barriers to entry in local politics are  
21 low, and the City provides resources to all candidates. (VF58.) Even if Latinos are on average less  
22 wealthy than whites, there is no evidence that Latino candidates can raise money only or principally  
23 from other Latinos. Latino candidates have raised large sums of money in Council and other elections,  
24 and many have won. (VF59.) And none of the disparities to which plaintiffs point would be any  
25 different if the City had used districts for Council elections. The achievement gap, for example, has  
26 nothing to do with the Council. The School Board—which has had between 1 and 3 Latino members,  
27 including de la Torre, for the last 25 years—has exclusive authority over City schools. (VF60.)

28  

---

<sup>14</sup> The City also abandoned dilutive mechanisms like designated posts in 1946. (See Part III.B.3.)

1           **Fourth**, plaintiffs’ limited and dated evidence of racial appeals (the 1994 election that Vazquez  
2 narrowly lost) is outweighed by the lack of evidence of any such appeals in any other elections, includ-  
3 ing Vazquez’s 1990, 2012, and 2016 victories, and Nat Trives’s 1971 and 1975 victories. (VF61.)

4           **Fifth**, plaintiffs’ evidence of a supposed lack of responsiveness ignores historical context. The  
5 land where Gandara Park and the City Yards are located was first devoted to industrial use (clay-mining  
6 and brickmaking) well over a century ago, long before residences were built in the area. (VF62.) The  
7 placement of the Expo maintenance facility in the same historically industrial area was out of the Coun-  
8 cil’s hands and replaced another private commercial yard at the same location. (VF63.)

9           Nor does Pico shoulder all the City’s “burdens.” There are other City yards in other neighbor-  
10 hoods, including a 7-acre bus lot downtown and yards on the PCH, in Mid-City, and in Sunset Park, as  
11 well as firehouses throughout the City. (VF64.) Plaintiffs’ narrative about “poisonous” gas is irre-  
12 sponsible and false. The City has for decades hired experts to oversee a gas-abatement program and  
13 provide regular reports to the Council and regulatory authorities; the City has remained in compliance  
14 with all applicable regulations. (VF65.) Plaintiffs also have not shown that Latinos have *applied and*  
15 *been rejected* from positions on any commissions—an element of a prima facie case of racial discrim-  
16 ination in hiring. (*Tex. Dep’t of Comm. Affairs v. Burdine* (1981) 450 U.S. 248, 253 & fn. 6.) And the  
17 theory that councilmembers select only applicants who share their race or ethnicity is unfounded;  
18 Vazquez has been on the Council the last six years. Finally, plaintiffs neglect to mention the tens of  
19 millions of dollars that the City has invested in Pico in recent years (e.g., on projects such as Virginia  
20 Avenue Park, Pico Library, Ishihara Park, MANGo, and Memorial Park, as well as City-sponsored  
21 vocational and educational programs). (VF66.) Plaintiffs also overlook the many City-funded pro-  
22 grams that benefit lower-income Pico residents, including Latinos and non-Latinos, (e.g., affordable  
23 housing, strict rent-control laws, and direct assistance to low-income tenants). (VF67.)

24 **D. The Court must find for the City to avoid unconstitutional application of the CVRA.**

25           The U.S. Constitution forbids the imposition of any predominantly race-based remedy unless  
26 that remedy is narrowly tailored to serve a compelling governmental interest. (See *Cooper v. Harris*  
27 (2017) 137 S.Ct. 1455, 1463–1464; *Shaw v. Hunt* (1996) 517 U.S. 899, 907–908; *McLaughlin v. Flor-*  
28 *ida* (1964) 379 U.S. 185, 191–192.) Courts have assumed without deciding that governments have a

1 compelling interest in remedying vote dilution. (*Cooper*, 137 S.Ct. at p. 1464.) Here, there is no  
2 evidence of vote dilution: As explained above, districts would not enhance the voting strength of La-  
3 tinos within the “Pico” district, and would submerge other Latinos—and other minorities—in over-  
4 whelmingly white districts. (Part II.B.2; see also VF68; *Aldasoro*, 922 F.Supp. at 366; *Turner v. Ark.*  
5 (E.D.Ark. 1991) 784 F.Supp. 553, 571; *Overton v. City of Austin* (W.D.Tex. Mar. 12, 1985) 1985 WL  
6 19986, at \*15.)<sup>15</sup> Similarly, no alternative at-large voting system would enhance Latino voting  
7 strength. (Part II.B.2.) The Constitution precludes imposing a race-conscious “remedy” that would  
8 overturn the City’s choice of electoral system while curing no ills and creating new ones.<sup>16</sup>

9 **III. Plaintiffs have not proven their Equal Protection claim.**

10 To prevail on their Equal Protection claim, plaintiffs must demonstrate that the City’s at-large  
11 electoral system has caused a disparate impact that was intended by the relevant decisionmakers. (*Rog-*  
12 *ers v. Lodge* (1982) 458 U.S. 613, 617; *Johnson v. DeSoto Cty. Bd. of Comm’rs* (11th Cir. 2000) 204  
13 F.3d 1335, 1343–1346; *Cano*, 211 F.Supp.2d at 1245.) In other words, constitutional vote-dilution  
14 claims are proven in the same way as any other Equal Protection claims—through evidence of disparate  
15 impact, causation, and discriminatory intent. (*Rogers*, 458 U.S. at 617.)<sup>17</sup> Each is necessary but insuf-  
16 ficient on its own. (*Washington v. Davis* (1976) 426 U.S. 229, 239 [disparate impact alone not enough];

17 <sup>15</sup> Supplying a remedy to enhance the “influence” of Latino voters, absent both an operational definition  
18 of that term and evidence that Latino voting strength would be enhanced, would not advance any com-  
19 pelling state interest. Federal courts have been unable to craft a workable standard for influence claims  
20 and have rejected them on constitutional and justiciability grounds. (See, e.g., *LULAC*, 548 U.S. at  
21 446; *Dillard v. Baldwin Cty. Comm’rs* (11th Cir. 2004) 376 F.3d 1260, 1267.) The CVRA itself allows  
22 consideration of *Gingles’* first precondition, numerosity and geographic compactness, in determining  
23 an appropriate remedy (§ 14028(c)), and California courts have recognized the constitutional questions  
24 posed by a remedy other than a majority-minority district. (See *Sanchez*, 145 Cal.App.4th at 688-90.)

25 <sup>16</sup> Even were a remedy justified (for either the CVRA or Equal Protection claim), the Court could at  
26 most order the City to fashion one, not itself do so. Santa Monica is a charter city whose ordinances  
27 “supersede state law with respect to ‘municipal affairs.’” (*State Bldg. & Constr. Trades Council v. City*  
28 *of Vista* (2012) 54 Cal.4th 547, 555, quoting Cal. Const., art. XI, § 5.) In *Jauregui*, 226 Cal.App.4th at  
794–808, the Court of Appeal relied on a finding of vote dilution to hold that charter cities are subject  
to the CVRA and that the trial court had authority to enjoin election results under § 14029. To the  
extent *Jauregui* also held that courts may fashion remedies for charter cities after finding that their at-  
large electoral systems result in vote dilution, the case was wrongly decided. There may be a statewide  
interest in remedying vote dilution, but there is no such interest in remedying it by court order. Charter  
cities should be able to fashion their own remedies, subject to judicial review. (See, e.g., *Westwego*  
*Citizens for Better Gov’t v. City of Westwego* (5th Cir. 1991) 946 F.2d 1109, 1124.)

<sup>17</sup> The relevant California decisional law tracks federal law. (See *Jauregui*, 226 Cal.App.4th at 800  
[“California decisions involving voting issues quite closely follow federal Fourteenth Amendment  
analysis.”]; *Hull v. Cason* (1981) 114 Cal.App.3d 344, 372–374 [“[t]he equal protection standards of

1 *Personnel Adm'r v. Feeney* (1979) 442 U.S. at 273–274, 279 [intent must also be shown]; *Palmer v.*  
2 *Thompson* (1971) 403 U.S. 217, 224 [intent alone not enough]; *Cano*, 211 F.Supp.2d at 1248 [same];  
3 *Johnson*, 204 F.3d at 1345–1346 [impact *and* intent not enough without proof of causation].)

4 **A. Plaintiffs have not proven a disparate impact caused by the City’s election system.**

5 Disparate impact in an Equal Protection analysis is proven with evidence that a protected class  
6 would have greater opportunity under some other method of election. (E.g., *Johnson*, 204 F.3d at  
7 1344.) Because the standard for proving vote dilution under VRA § 2 “was intended to be more per-  
8 missive than the constitutional standard” (*ibid.*), and because the CVRA is, in turn, a more permissive  
9 version of § 2, failure to prove vote dilution in support of a CVRA claim must, *a fortiori*, mean failure  
10 to prove disparate impact in support of a constitutional claim. (See, e.g., *Lopez v. City of Houston*  
11 (S.D.Tex. May 22, 2009) 2009 WL 1456487 at \*18.)

12 Plaintiffs have not shown that an alternative method of election would have enhanced minority  
13 voting power at any time since 1946. There is no “benchmark” against which the City’s current elec-  
14 toral system can be measured and found wanting—either now or historically. As has been true since  
15 1946, minority voters are too few in number and too dispersed throughout the City for any other system  
16 to enhance their voting strength. (VF69; see also Part II.B.2.) In 1946, the City moved from a three-  
17 commissioner at-large system to a seven-councilmember at-large system. (VF70.) Candidates no  
18 longer ran for a single numbered seat, but for one of three or four seats, making it easier for represent-  
19 atives of minority groups to win even with limited support from whites. (*Ibid.*) Contemporary observ-  
20 ers correctly argued that this new method of election would benefit minority voters. (VF71.)

21 **B. The City did not adopt or maintain its electoral system to discriminate against minorities.**

22 Discrimination did not inform the Freeholders’ submission of the City’s current Charter to the  
23 electorate in 1946 or the City Council’s vote against switching to districted elections in 1992.

24 **1. Purposeful discrimination is an element of plaintiffs’ Equal Protection claim.**

25 Whereas a statutory vote-dilution claim depends only on the *results* of an at-large system, a  
26 constitutional vote-dilution claim also requires proof that those results were *intended*. (See, e.g., *City*

27 the Fourteenth Amendment, and of the state’s Constitution, are substantially the same”]; *Sanchez v.*  
28 *State* (2009) 179 Cal.App.4th 467, 487 [citing federal law for elements of Equal Protection claim]; *Kim*  
*v. Workers’ Comp. Appeals Bd.* (1999) 73 Cal.App.4th 1357, 1361 [same].)

1 of *Mobile v. Bolden* (1980) 446 U.S. 55, 66–67, superseded by statute on other grounds; *Osburn v. Cox*  
2 (11th Cir. 2004) 369 F.3d 1283, 1288.) The intent analysis is “a complex task requiring ‘a sensitive  
3 inquiry into such circumstantial and direct evidence of intent as may be available.’” (*Bossier*, 520 U.S.  
4 at 488.) The leading case on “[d]etermining whether invidious discriminatory purpose was a motivat-  
5 ing factor” behind a challenged decision is *Village of Arlington Heights v. Metropolitan Housing De-*  
6 *velopment Corp.* (1977) 429 U.S. 252, 266, which identified five non-exhaustive factors that might  
7 support an inference that a challenged enactment was motivated by discrimination: (1) “[t]he impact  
8 of the official action”—i.e., “whether it ‘bears more heavily on one race than another’”; (2) “[t]he  
9 historical background of the decision . . . , particularly if it reveals a series of official actions taken for  
10 invidious purposes”; (3) “[t]he specific sequence of events leading up to the challenged decision”; (4)  
11 “[d]epartures from the normal procedural sequence” or “[s]ubstantive departures”; and (5) “[t]he leg-  
12 islative or administrative history . . . , especially where there are contemporary statements by members  
13 of the decisionmaking body, minutes of its meetings, or reports.” (429 U.S. at 266–268.)

14 **2. Proof of intentional discrimination requires more than mere awareness of a poten-**  
15 **tially adverse impact on minorities.**

16 Plaintiffs have not produced even a scrap of direct evidence of intentional discrimination.<sup>18</sup>  
17 They suggest that the Board of Freeholders in 1946 and the City Council in 1992 were *aware* that their  
18 decisions *could* result in a disparate impact on minorities, and that this awareness alone is enough to  
19 prove their Equal Protection claim. (See Br. at 1, 17.) This is wrong. Even if the evidence did show  
20 an awareness that at-large elections could dilute minority voting power—and it does not—that showing  
21 would be insufficient under longstanding law to demonstrate purposeful discrimination.

22 The Supreme Court rejected plaintiffs’ theory decades ago, holding that “[d]iscriminatory pur-  
23 pose’ . . . implies more than intent as volition or intent as awareness of consequences. It implies that  
24 the decisionmaker . . . selected or reaffirmed a particular course of action at least in part ‘because of,’  
25 not merely ‘in spite of,’ its adverse effects upon an identifiable group.” (*Feeney*, 442 U.S. at 279.)  
26 Federal and California courts have quoted and applied this holding ever since. (E.g., *SECSYS, LLC v.*  
27 *Vigil* (10th Cir. 2012) 666 F.3d 678, 685; *Soto v. Flores* (1st Cir. 1997) 103 F.3d 1056, 1067; *David K.*

28 <sup>18</sup> Plaintiffs contend that Zane’s comments at the 1992 Council meeting qualify as direct evidence of  
such intent. (Br. at 19–20.) This is false, as will be demonstrated in Part III.B.3.

1 *v. Lane* (7th Cir. 1988) 839 F.2d 1265, 1272; *People v. Superior Court* (1992) 8 Cal.App.4th at 711.)<sup>19</sup>  
2 And courts have applied *Feeney*'s evidentiary requirement of purposeful discrimination—and rejected  
3 plaintiffs' theory that mere awareness of consequences is enough to prove it—in vote-dilution cases  
4 like this one. (E.g., *Bolden*, 446 U.S. at 71, fn. 17.)

5 In support of their contrary theory, plaintiffs cite only the opinion and partial concurrence in  
6 *Garza*, but neither stands for the proposition that mere awareness of consequences is enough to support  
7 a claim of purposeful discrimination. In *Garza*, the district court found that the L.A. County Board of  
8 Supervisors, intent on maximizing the probability of their own reelection, “chose fragmentation of the  
9 Hispanic voting population as the avenue by which to achieve this self-preservation.” (918 F.2d at  
10 771.) “The supervisors intended to create the very discriminatory result that occurred.” (*Ibid.*) In his  
11 separate opinion, Judge Kozinski noted that “there is no indication that what the district court found to  
12 be intentional discrimination was based on any dislike, mistrust, hatred, or bigotry against Hispanics  
13 or any other minority group.” (*Id.* at 778.) The district court had instead found evidence of a “desire  
14 to assure that no supervisorial district would include too much of the burgeoning Hispanic population.”  
15 (*Ibid.*) Neither opinion in *Garza* is inconsistent with *Feeney*, and neither reduces plaintiffs' burden of  
16 proof. At the least, plaintiffs must demonstrate that weakening minority voting power was the deliber-  
17 erately chosen “avenue” for accomplishing some other purpose, such as preserving incumbency.

18 **3. The City's electoral history belies plaintiffs' discrimination claim.**

19 **1906:** The City's voters adopted its original Charter, which divided the City into seven districts,  
20 or “wards,” each represented by a different councilmember. (VF72.)

21 **1914:** The voters abandoned the ward system, approving a second Charter that replaced seven  
22 councilmembers elected by ward with three commissioners elected at-large. (VF73.) The new posi-  
23 tions—heads of Public Works, Finance, and Public Safety—were designated posts; candidates ran  
24 against only other candidates for a particular commissionership. (VF74.) Elections were staggered,  
25 with voters selecting one commissioner in one election cycle and two in another. (VF75.) The City

26  
27 <sup>19</sup> Some plaintiffs have attempted “to circumvent this unfavorable precedent by arguing that ‘this case  
28 is not about “awareness” or “consciousness” of racial information,” but something else entirely, such  
as “embracing and relying on such information”; courts have consistently rejected such efforts. (*Spur-*  
*lock v. Fox* (6th Cir. 2013) 716 F.3d 383, 399; see also *Price v. Austin Ind. Sch. Dist.* (5th Cir. 1991)  
945 F.2d 1307, 1319–1320; *Clark v. Huntsville City Bd. of Educ.* (11th Cir. 1983) 717 F.2d 525, 529.)

1 also adopted ranked-choice voting, with voters indicating their first, second, and “other” choices for  
2 each position. (VF76.) Dr. Kousser admitted “there is no evidence one way or the other of whether  
3 race or ethnicity played a role in th[e] decision” to adopt the new election system in 1914. (VF77.)

4 **1925:** The City abandoned ranked-choice voting but kept the three designated posts. (VF78.)

5 **1946:** By 1945, the limitations of the commission form of government had become evident,  
6 and the voters overwhelmingly approved the creation of a Board of Freeholders to draft a third Charter.  
7 (VF79.) The Board proposed comprehensive reforms of the City’s elections and system of governance.  
8 The Charter won a substantial majority of votes in almost every precinct in 1946. (VF80.)

9 Although the 1946 Charter featured prominently at trial, plaintiffs scarcely mention it in their  
10 brief. And no evidence in their verdict form shows purposeful discrimination under *Arlington Heights*.

11 The new Charter’s many changes could only have had a **positive impact on minorities**. Three  
12 commissioners became seven councilmembers, making it easier for a cohesive minority group to elect  
13 candidates of its choice. (VF81.) Voters who previously had at most two votes to cast (in separate  
14 races) could now cast three or four votes for candidates in the same election. (VF82.) Designated  
15 posts, recognized as a classic mechanism for perpetrating invidious discrimination, were abandoned.  
16 (VF83.) The new system did not impose a majority-vote requirement or prohibit bullet voting, allowing  
17 minorities to maximize their voting strength. (VF84.) And any districted system “would have been  
18 highly detrimental to minorities,” as it would have packed some of them into a district where they  
19 would not have the ability to elect candidates of their choice and submerged the rest in overwhelmingly  
20 white districts. (VF85.) Also, the 1946 Charter prohibited discrimination against City employees on  
21 the basis of race, punishing violations with a fine and/or imprisonment. (VF86.)

22 **No history of official discrimination** preceded the 1946 charter. Plaintiffs’ only source on the  
23 Zoot Suit Riots exonerates Santa Monica. (VF87.) Anti-Japanese sentiments—while despicable—  
24 were the isolated and temporary product of wartime fervor (and not focused on elections). (VF88.)  
25 The beach was segregated by tradition, not law. (VF89.) Plaintiffs have no specific evidence of racial  
26 covenants in Santa Monica; which would be features of private contracts in any event. (VF90.)

27 Nothing in the **sequence of events** leading up to the 1946 Charter’s adoption suggests a dis-  
28 criminatory motive. **First**, Dr. Kousser identified no evidence that any Freeholders harbored any racial

1 animus. (VF91.) **Second**, Dr. Kousser pointed to the growth of the non-white population as a motive  
2 for changing the City's method of election, but the minority population grew substantially only in per-  
3 centage, not absolute, terms; the City's population remained overwhelmingly white.<sup>20</sup> (VF92.) **Third**,  
4 Dr. Kousser suggested that Santa Monica voters must have been racist because they rejected Prop. 11,  
5 and that such racism must have bled into their voting on the 1946 Charter. (Pl. Br. at 18.) But his sole  
6 source on interpreting propositions, Prof. HoSang's book, notes that Prop. 11 was not, as Dr. Kousser  
7 contended and plaintiffs somehow still insist, a "pure measure of attitude on racial discrimination,"  
8 because *both sides* appealed to racial tolerance and charged the other with racial intolerance. (*Ibid.*;  
9 VF94.) Prop. 11 was also associated with communism. (VF95.) And Prof. HoSang explains that it is  
10 unreasonable to conclude that opposition to Prop. 11 was racially driven because many people who  
11 voted against Prop. 11 also voted against a straightforwardly racist measure, Prop. 15, which would  
12 have barred aliens from holding land. (VF96.) Tellingly, Dr. Kousser omitted Prop. 15 from his dec-  
13 laration, even though he had remarked on it in his notes. (VF97.)

14       There were **no procedural or substantive departures** suggesting a discriminatory purpose in  
15 1946. Dr. Kousser pointed to the Freeholders' consideration of putting districts or a hybrid system to  
16 a vote (VF98), but there is nothing suspicious about the decision not to do so. No one, particularly  
17 minorities or those opposed to the Charter, was clamoring for districts; the ballot was already long and  
18 complicated, so there was real risk of confusion if voters had to choose among competing systems; and  
19 a hybrid system would have been "the worst of all worlds for minorities," who were too few in number  
20 to control a district and who would have been able to vote for only four councilmembers (three at-large  
21 and one in a district) instead of seven. (VF99.) The high degree of transparency was also inconsistent  
22 with an intent to conceal racial discrimination. (VF100.) The Freeholders and local civic organizations  
23 organized meetings to discuss the Charter, including with members of the NAACP. (VF101.)

24       Finally, Dr. Kousser cited **no legislative or administrative history**, but an analysis of contem-  
25 poraneous statements belies his contention that minorities opposed the Charter and favored districts.  
26 Little of the substantial public debate over the Charter concerned districts. (VF102.) Further, there is  
27 *no* record evidence showing that *any* members of *any* minority group advocated for districts (VF103),  
28

---

<sup>20</sup> The Latino population, though not counted by the Census in that era, was likely quite small. (VF93.)

1 which is unsurprising because the minority population in 1946 was too small for districts to have given  
2 any minority group the ability to elect candidates of its choice. (VF104.) In fact, there is no evidence  
3 that *any* racial or ethnic minorities opposed the Charter. (VF105.) To the contrary, notable minority  
4 leaders in Santa Monica openly *endorsed* the Charter, including the City's most prominent African-  
5 American leader (Reverend W.P. Carter) and other members of Santa Monica's Interracial Progress  
6 Committee. (VF106.) (Dr. Kousser mentioned none of this in his declaration.)

7 Plaintiffs purport to identify evidence reflecting awareness of a connection between districts  
8 and increased minority representation. (VF107.) Any such evidence would, of course, be inadequate  
9 under longstanding law holding that mere awareness of consequences is insufficient to prove discrim-  
10 inatory intent. (Part III.B.2.) But plaintiffs' evidence does not remotely prove their point in any event.  
11 **First**, the *Outlook* editorials plaintiffs cite, one of which Dr. Kousser said "is quite close to a smoking  
12 gun," are calls for civic unity, not racial exclusion.<sup>21</sup> (VF108.) **Second**, Dr. Kousser twisted two  
13 Freeholders' statements in favor of the Charter into tacit acknowledgments that districts would be better  
14 for minorities than an at-large system. (VF110.) Those statements have nothing to do with districts  
15 (neither of the relevant articles even addresses districts); the speakers argue that the Charter would  
16 more than double the representation of minority groups; and Dr. Kousser overlooked the fact that both  
17 of those Freeholders expressly argued *against* districts, one of them citing "every authority on City  
18 government consulted by the Freeholders." (VF111.) **Third**, the Anti-Charter Committee advertise-  
19 ments (VF112) do *not* call for districted elections. On the contrary, the ads make clear that Committee  
20 favored the status quo: a three-commissioner, designated-post system, which was far less favorable to  
21 minorities than the new system. (VF113.) The Committee defended the commission form of govern-  
22 ment by lauding the example of Topeka, Kansas—whose Board of Education would, a few years later,  
23 be the defendant in *Brown v. Board*. (VF114.) Although supporters of the Charter, many of them  
24 minorities, publicly declared their support, Anti-Charter Committee members mostly identified them-  
25 selves only as "business men and other private citizens"; and the few who did reveal their names were  
26 not members of the Interracial Progress Committee. (VF115.)

27  
28 <sup>21</sup> Dr. Kousser cited the same editorial in his 1992 report, prepared for the City, but there noted that  
his "tentative" conclusion was *not* predicated on any "smoking gun." (VF109.)

1           **1975:** The voters overwhelmingly rejected Prop. 3, which called for districts and a host of other  
2 changes. (VF116.) In his 1992 report, Dr. Kousser concluded that this vote was not motivated by  
3 discrimination. (VF117.) He gave many reasons, among them that the City’s two African-American  
4 councilmembers, one of whom had recently been elected mayor, opposed Prop. 3, and that the *Outlook*  
5 endorsed two minority candidates, both of whom were elected. (VF118.) Although at trial he had no  
6 evidence to contradict any of his prior findings (VF119), Dr. Kousser stated in his declaration and at  
7 trial that he had “now changed [his] mind.” (VF120.) But neither of his reasons for doing so made  
8 any sense. His research on the *Crawford* decision, which concerned desegregation in L.A. schools,  
9 could not have “reminded” him of the extent of racism in the 1970s. (VF121.) Both the California  
10 Court of Appeal and U.S. Supreme Court held that the plaintiffs in that case had *failed* to prove pur-  
11 poseful discrimination. (113 Cal.App.3d 633, 645–646; 458 U.S. 527, 545.) And Dr. Lichtman proved  
12 that Dr. Kousser’s statistical analysis (purportedly showing a connection between votes for Latino can-  
13 didates and for Prop. 3) was flawed for at least half a dozen reasons. (VF122.) Dr. Kousser got it right  
14 in his 1992 report, as plaintiffs now recognize—they say not a word about 1975.

15           **1984:** The City began holding elections at the same time as gubernatorial and presidential  
16 elections. (VF123.) This favored minorities, as “off-year” elections depress turnout. (VF124.)

17           **1988:** Santa Monica voters overwhelmingly rejected Prop. J, which would have reintroduced  
18 designated posts, which are far less favorable to minorities than open seats. (VF125.)

19           **1992:** The City Council formed the Charter Review Commission to evaluate the merits of  
20 adopting a new method of election. The Commission engaged experts, held public meetings, and de-  
21 livered a report to the Council.<sup>22</sup> (VF126.) Fourteen of the 15 Commissioners favored switching to a  
22 new method of election, but they could not agree on a substitute system. (VF128.) Eight Commis-  
23 sioners favored a ranked-choice-voting scheme; only five preferred districts. (VF129.) The Commis-  
24 sioners noted that they had drafted the report with limited information and time, and that further inves-  
25 tigation was necessary before any conclusions could be drawn about the “probable success rates” of  
26

27 <sup>22</sup> Plaintiffs claim Dr. Kousser concluded in his 1992 report that the City adopted its election system  
28 for a discriminatory purpose. (Br. at 18.) This is false. Dr. Kousser concluded only that a plaintiff  
could make a prima facie case to that effect, such that the City would have to defend itself—and he  
characterized even that conclusion as “quite tentative.” (VF127.)

1 minority-preferred candidates under the competing systems. (VF130.) After a public hearing, the  
2 Council voted not to put either ranked-choice voting or districts on the ballot, but resolved to collect  
3 further information on alternative election schemes. (VF131.)

4 Plaintiffs admit there is no evidence of racial animus on the part of the Council in 1992; in fact,  
5 the councilmembers consistently expressed a desire to *expand* minority representation. (VF132.) At  
6 trial, plaintiffs' theory appeared to be that councilmembers voted against districts to preserve their own  
7 seats, as in *Garza*. (VF133.) But then it turned out that 3 of the 4 councilmembers who voted against  
8 districts, including Dennis Zane, did not seek reelection when their terms expired. (VF134.)

9 Plaintiffs now say that they never intended to argue this incumbency theory; they have instead  
10 contrived an even more attenuated theory of discrimination—that Zane was trying to preserve the clout  
11 of SMRR and “his power to continue dumping affordable housing” in Pico. (Br. at 19.) This outlandish  
12 theory has no basis in *any* case law. And it depends *entirely* on a gross misreading of Zane’s public  
13 comments at a 1992 Council meeting, which plaintiffs term a “smoking gun.” (Br. at 20.) Zane stated  
14 that districts might render each councilmember a parochial “case manager . . . rather than [a] policy  
15 maker,” “afraid” to pass affordable housing projects in the face of “neighborhood protests.” (VF135.)  
16 He therefore proposed a “hybrid” system that would, in his view, enhance minority representation *and*  
17 allow the Council to provide affordable housing for the poor. (*Ibid.*) Zane did *not* express a desire to  
18 “continue to dump” affordable housing in Pico.<sup>23</sup> (*Ibid.*; see also VF136.)

19 Plaintiffs discuss only Zane in their brief, but if their theory is that other councilmembers also  
20 voted against districts to preserve SMRR’s power, the record disproves that argument, too. **First**,  
21 districts would not have eroded SMRR’s influence; the Charter Review Commission stated that it had  
22 “no reason to believe that slate politics could not comfortably adapt to the district format.” (VF138.)  
23 **Second**, after 1992, Latino voters did not perceive that their interests were being represented by the  
24 councilmembers who had backed a switch to districts. Holbrook favored districts (and explained at the  
25 Council hearing that he expected to win if districts were adopted, as no other incumbent lived in his  
26 district), but won roughly *zero* Latino votes in 1994; Olsen publicly opposed districts, but won roughly  
27

28 <sup>23</sup> Plaintiffs question the City’s decision not to call Zane to the stand to defend himself (Br. at 19), but  
their own expert said that any such testimony would be valueless. (VF137.)

1 all Latino votes in 1996. (VF139.) **Third**, SMRR has never been even remotely hostile to minority  
2 candidates and voters. SMRR has consistently endorsed minority candidates, including Loya and de  
3 la Torre. (VF140.) Minorities, including Loya, have also served on SMRR's steering committee.  
4 (VF141.) Nor is there any evidence of SMRR resisting districts. SMRR has endorsed many candidates  
5 who publicly favored districts, including Loya and de la Torre, and repudiated candidates who opposed  
6 districts. (VF142.) And the chair of the Charter Review Commission, which recommended the aban-  
7 donment of the at-large system, was also then serving as the *co-chair* of SMRR. (VF143.)

8 A review of the *Arlington Heights* factors similarly demonstrates that the Council did not act  
9 with discriminatory intent in 1992. First, there is no evidence that the Council's decision resulted in  
10 any negative **impact on minorities**. No analysis shows that districted elections would have allowed  
11 Latinos to elect candidates of their choice in 1992. (VF144.) Any districted system would have had  
12 an *adverse* effect on minority groups, which would have been too small to elect candidates of choice  
13 in any district but whose influence would have been diluted across seven districts. (VF145.)

14 Plaintiffs have identified no evidence of **official discrimination**. To the contrary, the **sequence**  
15 **of events** leading up to the vote is entirely inconsistent with plaintiffs' theory of discrimination. The  
16 City had recently enacted measures beneficial to minorities, including changing the timing of its elec-  
17 tions to coincide with national elections, prohibiting discrimination in private clubs, and requiring 30%  
18 of new construction to be set aside for affordable housing. (VF146.) Voters had also elected Vazquez  
19 in 1990 and rejected a 1988 measure that would have reinstated designated posts. (VF147.)

20 Dr. Kousser admitted there were **no procedural or substantive departures** in 1992. (VF148.)  
21 And the relevant **legislative history** also belies plaintiffs' contention that the Council discriminated  
22 against minorities in declining to put districts on the ballot. Even the Charter Review Commission did  
23 not favor districts, and for a variety of reasons, including: (i) "voting Latinos in the district might be  
24 too few to prevail, and Latinos outside the district would have less influence on the outcome than they  
25 do now"; (ii) African-Americans and Latinos in the targeted district would not vote cohesively but  
26 instead for their own candidates "in head-to-head competition," with a white candidate possibly emerg-  
27 ing as the winner; (iii) minorities were not sufficiently concentrated for districts to make sense; (iv)  
28 voters would lose influence over six of seven councilmembers; (v) councilmembers would focus only

1 on their own districts rather than the good of the whole City; and (vi) voters would vote only every  
2 four years instead of every two. (VF149.) The Commission also had many reservations about ranked-  
3 choice voting, expressing, among other things, “serious doubts about its practicality.” (VF150.) Fi-  
4 nally, insofar as plaintiffs’ argument is that Zane or anyone else purportedly recognized a connection  
5 between districts and ethnic representation (VF151), *mere awareness* of such a connection is an inad-  
6 equate basis for a finding of discriminatory intent. (See Part III.B.2.)

7 In 2002, the voters again overwhelmingly rejected districted elections. (VF152.) Dr. Kousser  
8 elected not to examine this vote because districts were but one part of a package of significant proposed  
9 changes. (VF153.) But he had no qualms about analyzing the 1946 election, despite the fact that the  
10 Charter amendment did not even concern districted elections *and* proposed more (and more significant)  
11 changes to Santa Monica’s government than Measure HH in 2002. (VF154.) The Court should con-  
12 sider his reservations about 2002 in evaluating his 1946 analysis.<sup>24</sup>

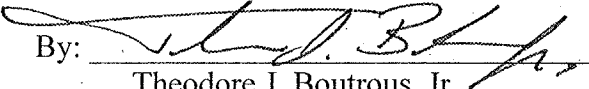

13 No court has ever predicated a weighty finding of intentional discrimination on so little as plain-  
14 tiffs’ Zane-centric theory. If the Freeholders or councilmembers had ever harbored a discriminatory  
15 purpose, they could have retained designated posts, prohibited bullet voting, reduced the size of the  
16 council, preserved off-year elections, and/or adopted a majority-vote requirement with runoffs. (See  
17 *Gingles*, 478 U.S. at 38, fn. 5; *Benavidez*, 2014 WL 4055366 at \*21; VF155.) They did none of those  
18 things. (VF156.) The City’s current system evidences no intent to discriminate against minorities.

19 **IV. Conclusion**

20 The Court should enter judgment in favor of the City.

21  
22 DATED: October 15, 2018

Respectfully submitted,  
GIBSON, DUNN & CRUTCHER LLP

28 <sup>24</sup> Plaintiffs also suggest that the Council recently rejected a proposal to switch to districts. (Br. at 21.)  
The record does not support that (irrelevant) assertion, just as it does not support plaintiffs’ continuing  
speculation about consulting experts whom the City may have hired. (Br. at 4, fn.3.)

1 **PROOF OF SERVICE**

2 I, Cynthia Britt, declare:

3 I am employed in the County of Los Angeles, State of California. My business address is 333  
4 South Grand Avenue, Los Angeles, California 90071. I am over the age of eighteen years and not a  
party to the action in which this service is made.

5 On October 15, 2018, I served

6 **DEFENDANT CITY OF SANTA MONICA'S CLOSING BRIEF**

7 on the interested parties in this action by causing the service delivery of the above document as  
8 follows:

9 Kevin I. Shenkman, Esq.,
