City of Santa Monica

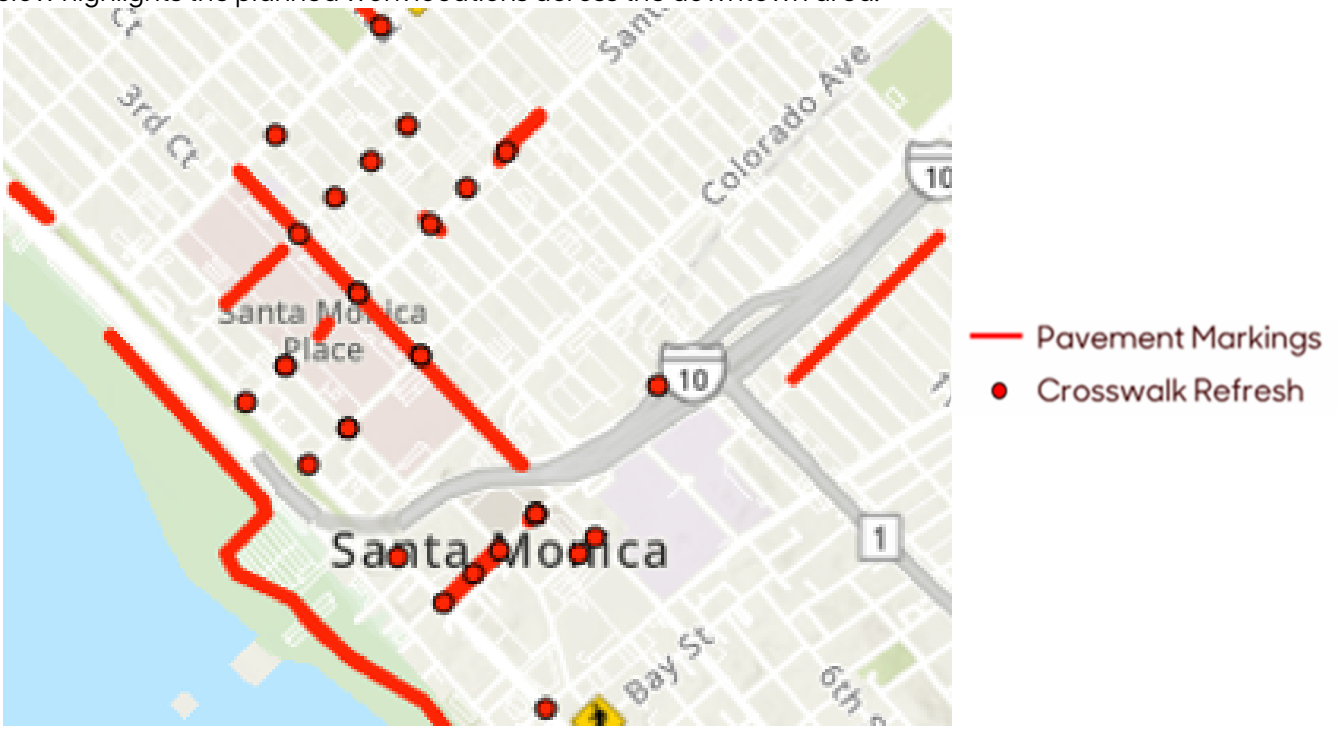

NOTICE

Citywide Crosswalk and Pavement Markings Project

Construction Schedule: May 26th, 2026, through August 24th, 2026

Project Overview

The City of Santa Monica has contracted Superior Pavement Markings, LLC to deliver the Citywide Crosswalk and Pavement Markings Project. The project is a key investment in enhancing pedestrian experience and revitalizing the City's transportation infrastructure. Work will focus on upgrading and refreshing roadway markings in high pedestrian traffic areas in the downtown core and citywide. Improvements will include repainting crosswalks, traffic lane striping, bike path striping, and other essential pavement markings. The map below highlights the planned work locations across the downtown area.

We understand this process is inconvenient and will make every effort to minimize any inconvenience that this work may cause. Please note that the start and completion time/date of construction may be delayed due to unforeseen conditions and weather. Due to the operation of heavy equipment necessary for construction, the project will create intermittent loud noise. Thank you in advance for your patience and understanding.

What to expect

- Temporary lane reductions, closures, detours
- No Parking zones
- Periods of construction noise
- Driveway and sidewalk access maintained with intermittent restrictions
