

Ground Water Production Well SM-14 Drilling Project

Construction Schedule: Monday, July 27th to Late September 2026

Work Hours: Monday – Sunday, Continuous 24-Hour Basis

Location: Olympic Blvd median between Stuart and Centinela

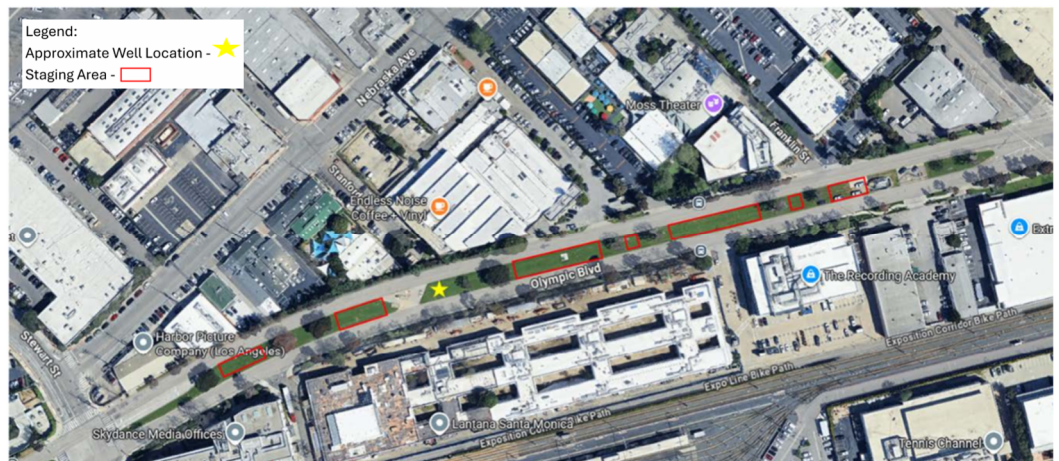

Project Overview

A new groundwater production well SM-14 will be drilled and installed in the Olympic Blvd wellfield. Water pumped from the well will be treated at the recently completed Olympic Advanced Water Treatment Facility that is co-located at the City's Arcadia Water Treatment Plant 2 of 5 before being delivered to customers.

What to Expect

- Olympic Blvd is to remain open
- Intermittent lane closures or flaggers may be present to accommodate work activities
- Heavy drilling equipment used during construction will cause intermittent loud noises.
- Efforts to minimize or eliminate loud noise will be implemented

We understand this process is inconvenient and will make every effort to minimize any inconvenience that this work may cause. Please note that the start and completion time/date of construction may be delayed due to unforeseen conditions. Due to the operation of heavy equipment necessary for construction, the project will create intermittent loud noise. Thank you in advance for your patience and understanding.
